 - Z Control connectivity LED
- 10-4013 comes with reed sensor
- 10-4014 comes with mechanical float switch

Notes:

Either the Standard or Wifi APak can be used to monitor nearly any switch or pair of dry contacts.

For sewage applications, the models with mechanical float switch are recommended (10-4012 and 10-4014).

If a direct wired alarm is required use 10-2614, which is unchanged from our previous generation of alarms.
